Return over the
past decade

1st

EVER Regulated STO
on a Ferrari!

6

Strategic
partnerships

29

Countries,
regulated
security token

1st

APP worldwide that
is a Game thorough
which one purchases Token

About Curio

Concept being featured in TechCrunch, CNN Money and more even
before incorporating the company

July 2018 Curio Capital AG was finally incorporated

Within one year, Curio built strong partnerships which guarantee prime supply
of collectables, currently 500 rare collectables in the pipeline, storage,
maintenance and insurance.

Curio incorporated a Sub company in Liechtenstein where the Company was
working closely with the regulators to develop a blockchain act and finally

Overview Achieved!

Learn about collectables
as an alternative
investment

No more entry barriers to
the best performing asset
class

The Token is a regulated
security

Put together a balanced
portfolio and trade your
token

Collectables have performed
spectacularly as an investment
but only the enthusiasts know
about it. Curio spreads the news!

Invest in a fraction of the
collectable asset and participate in
the price development without a
high minimum investment, no
more lumpsums and no hassle with
buying, storing or insuring the
asset

At the emission of the token, each
asset gets a Swiss/Liechtenstein
ISIN which makes it a regulated
security, law confirm in over 29
countries, this does not only
bridge the traditional and the
digital way of investing, it also
brings security to the investor

Avoid lump risks by putting all
your savings in one investment
vehicle, spread them across
several assets to achieve a steady
performance.
Sell or buy token peer to peer or
on a decentralized exchange * and
hopefully soon over regulated
digital exchanges

Overview Coming Up!

Visit your collectables

Display your investment in
a virtual gallery

Upgrade your collection

Be among the top investors to get
an invitation to our storage facility
where you get to see all the
collectables and perhaps drive a
superior or two :-)

more lumpsums and no hassle with
buying, storing or insuring the
asset

Solution

Now you can invest in cars & other
collectables with 3-clicks

Curio splits collectable assets into digital assets
where tokens can trade like stocks
each with an international securities
identification number ISIN

Problem

Illiquidity

Beyond auction houses or online
portals, no exchange exists for stocks
linked to collectable assets.

Barriers to Entry

Collectable assets are usually
sold through narrow networks.

...
High Minimum Stake
Collectable assets like classic cars can
cost up to \$50M. The high cost makes it
difficult to diversify.

High Costs

Managing and storing such assets
requires in-house expertise which few
investors can afford.
